## 새로운 사이트 배포하기

The screenshot shows the Netlify dashboard interface. On the left, a sidebar contains navigation links: Team overview, Sites (highlighted with a red box), Builds, Integrations, Domains, Members, Audit log, Billing, and Team settings. The main content area is titled 'Add your site to Netlify' and includes the instruction 'Import an existing project from a Git repository or pick a starter template.' Below this, there are two primary options: 'Import an existing project' and 'Start from a template'. Under 'Import an existing project', the 'Import from Git' button is highlighted with a red box. Under 'Start from a template', there is a 'Browse templates' button. At the bottom of the main content area, there is a link that says '...or deploy manually'.

## Git repository와 연결

# Import an existing project from a Git repository

From zero to hero, three easy steps to get your site on Netlify.

1. Connect to Git provider

2. Select repository

3. Configure site and deploy

## Connect to Git provider

Choose the Git provider where your site's source code is hosted. When you push to Git, we run your build tool of choice on our servers and deploy the result.

You can [unlock options for self-hosted GitHub/GitLab](#) by upgrading to the Business plan.

Don't have a project yet? [Start from a template instead.](#)

1. github 선택

## No repositories found

This can happen when Netlify doesn't have access to the repositories in an account. Configure the Netlify app on GitHub, and give it access to the repository you want to link.

Configure Netlify on GitHub

2. configure netlify on github 클릭

Install on your personal account

☐ All repositories  
This applies to all current and future repositories owned by the resource owner.  
Also includes public repositories (read-only).

☒ Only select repositories  
Select at least one repository.  
Also includes public repositories (read-only).

Select repositories ▼

Selected 1 repository.

/netlify-test

with these permissions:

- ✓ Read access to code and metadata
- ✓ Read and write access to checks, commit statuses, issues, and pull requests

User permissions

Netlify can also request users' permission to the following resources. These permissions will be requested and authorized on an individual-user basis.

- ✓ Read access to email addresses

**Install** Cancel

Next: you'll be directed to the GitHub App's site to complete setup.

all 혹은 원하는 repo 선택하기

3. netlify에서 접근 허용할 repository 선택

## 사이트 배포

netlify사이트는 기본적으로 최상위 directory의 index.html 배포합니다.
